Love Lamb UK
Farmer Wool Grass
Rain Wildlife Field

A) Which two months of the year are lambing season, the time most lambs are born?.....

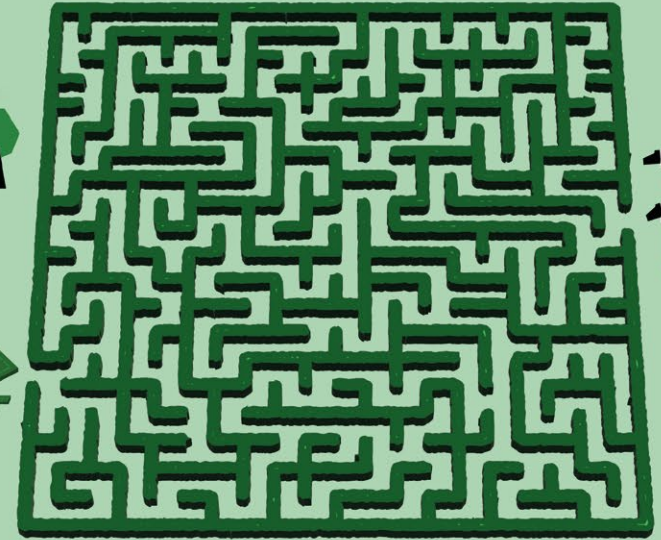

Many UK sheep are free to roam in their fields but are looked after by farmers, who make sure our countryside is just right for them to thrive.

During the summer, when it gets hot, sheep are sheared to remove their wool. Wool can be used for different things like home insulation or to make the clothes that keep us cosy in winter.

HELP THE LAMB FIND ITS FLOCK

B) True or false, sheep have 300-degree vision and can see behind them without turning around?.....

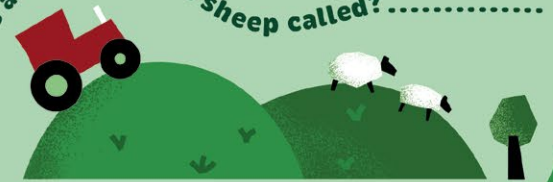

D) What is an adult male sheep called?.....

Rain is important because it helps the grass to grow, which is a constant source of sustainable food.

.....

E) What is an adult female sheep called?.....

C) How many different breeds of sheep are found in the UK?.....
