Key lessons from the improving feed efficiency workshop- photo story

Feed efficiency in dairy farming is a hot topic in Europe. An extremely hot and dry summer in Europe makes this topic top of mind for all dairy farmers. Earlier this year a technical workshop "Improving Feed Efficiency – sharing lessons across Europe" saw farmers and experts from across Europe and a range of systems meeting to identifying key drivers, practical strategies and techniques, recommendations and future challenges and opportunities to improve feed efficiency in dairy farming.

More information on the key take-home messages from the two EuroDairy pilot farm visit and from all of the speakers are available here:
