ADVISORY INFORMATION

IMPORTANT: When applying this product under the terms of this Extension of Authorisation, comply with any resistance guidance or restrictions stated on the product label.

Total reliance on one pesticide will hasten the development of resistance. Pesticides of different chemical types or alternative control measures should be included in the planned programme. Alternating with different modes of action is a recognised anti-resistance strategy.

Fluazinam is a dinitoaniline fungicide, FRAC MoA 29.

This Extension of authorisation relates to the use of 'Magic' (M18861) for control of Powdery scab (*Spongospora subterranea*). Application is to be made using in furrow spray in 100 to 400 litres water.
