ADVISORY INFORMATION

This Extension of authorisation relates to the use of 'Goltix 70 SC' (M16638) as a herbicide for the control of annual dicotyledonous and monocotyledonous weeds on parsnips. Application to be made by conventional horizontal boom sprayers in a minimum water volume of 80 litres per hectare. This Extension of Authorisation must not be used in conjunction with the Extension of Authorisation (2918 of 2014) for pre-crop emergent use on parsnip due to a potential exceedance of the products maximum total dose.

IMPORTANT: When applying this product under the terms of this Extension of authorisation, comply with any resistance guidance or restrictions stated on the product label.

Total reliance on one pesticide will hasten the development of resistance. Pesticides of different chemical types or alternative control measures should be included in the planned programme. Alternating with different modes of action is a recognised anti-resistance strategy.
