

EXTENSION OF AUTHORISATION FOR A MINOR USE OF A PLANT PROTECTION PRODUCT

PLANT PROTECTION PRODUCTS REGULATION (EC) No. 1107/2009

Product name: Decis Protech

Active ingredient: 15 g / l deltamethrin

MAPP number: 16160

Product authorisation holder: Bayer CropScience Limited (Registered Company
no. 218826)

Marketing company: Bayer CropScience Limited

This Extension of authorisation ends: on the final expiry date of use for the
authorised product (unless otherwise stated)

If the authorisation of the above product is withdrawn or amended before the end
date above, this Extension of authorisation will end on the same date as the
authorisation for the product. This Extension of authorisation will be withdrawn or
amended before its end date if a decision is taken to withdraw or amend this
Extension of authorisation under Regulation (EC) No 1107/2009 on any other
grounds.

Extent of authorisation: United Kingdom

This extension of authorisation for minor uses applies to all UK parallel trade
products issued under Article 52 of Regulation (EC) No 1107/2009 for which Decis
Protech with MAPP 16160 is the reference product.

Signed by: wayne.mcleod@hse.gov.uk
Signing time: Wednesday, February 8 2019, 15:24:11 GMT
Location: CRD York
Reason to sign: For the Health and Safety Executive

HSE Digital Signature

This and the attached Appendices 1 and 2 are signed by the Health and Safety
Executive ("HSE") for and on behalf of the Secretary of State, the Welsh Ministers,
the Scottish Ministers and the Department of Agriculture, Environment and Rural
Affairs in Northern Ireland.

EXPLANATORY NOTES

1. This is Extension of authorisation number 0679 of 2019.
2. This Extension of authorisation will be published on the website of the Chemicals Regulation Division of the HSE.
3. Application reference number: COP 2018/02362
4. Persons using the product to which this Extension of authorisation applies should acquaint themselves with and observe all requirements contained in the Regulation (EC) No 1107/2009, including the duty on the holder of any Extension of authorisation to notify information on potentially dangerous effects, a contravention of which is a criminal offence under those Regulations.
5. Neither the efficacy nor the phytotoxicity of the product for which this Extension of authorisation has been granted has been assessed and, as such, the user bears the risk in respect of failures concerning its efficacy and phytotoxicity.

ADVISORY INFORMATION

IMPORTANT: When applying this product under the terms of this Extension of Authorisation, comply with any resistance guidance or restrictions stated on the product label.

Total reliance on one pesticide will hasten the development of resistance. Pesticides of different chemical types or alternative control measures should be included in the planned programme. Alternating with different modes of action is a recognised anti-resistance strategy.

Where aphids resistant to products containing pyrethroids occur, this product is unlikely to give satisfactory control. Repeat treatments are likely to result in lower levels of control. For aphid control use a suitable aphicide depending on other pests present. Consult a BASIS qualified agronomist.

Where flea beetles resistant to products containing pyrethroids occur, this product is unlikely to give satisfactory control. Repeat treatments are likely to result in lower levels of control. For flea beetle control use a suitable insecticide depending on other pests present. Consult a BASIS qualified agronomist.

Growers should consult the IRAG website and the AHDB for further information on the current resistance status and management strategies for all target pests.

This Extension of Authorisation relates to the use of 'Decis Protech' (M16160) on: (i) red beet for the control of Aphids (*Aphididae*), Lepidoptera caterpillars (*Mamestra*, *Autographa*, *Pieris*), Beet fly (*Pegomyia hyoscyami*), Beet fly (*P. betae*) and Thrips (*Thysanoptera*); (ii) Celeriac and Jerusalem artichoke for the control of Aphids (*Aphididae*), Lepidoptera caterpillars (*Mamestra*, *Autographa*, *Pieris*), Thrips (*Thysanoptera*), Weevils (*Curculionidae*) and Leaf beetle (*Chrysomelidae*); and (iii) Radish and Salsify on Aphids (*Aphididae*), Lepidoptera caterpillars (*Mamestra*,

Autographa, Pieris), Thrips (*Thysanoptera*), Weevils (*Curculionidae*), Leaf beetle (*Chrysomelidae*) and Flea beetles (*Epitrix sp.*)

A maximum individual dose of 330ml product per hectare should be observed when using on radish and salsify for the control of ' Flea beetles (*Epitrix sp.*) .

Application is to be made via conventional hydraulic sprayer in 200 to 1500 litres water per hectare.

APPENDIX 1: CONDITIONS OF EXTENSION OF AUTHORISATION

The conditions below are obligatory. They must be complied with when the Extension of authorisation occurs. Failure to comply with the following conditions will result in the withdrawal or amendment of the Extension of authorisation under Regulation (EC) No 1107/2009 and may result in other enforcement action, including prosecution. For the purposes of this Extension of authorisation only, the conditions and/or requirements shown below supersede any corresponding conditions and/or requirements set out on the label or otherwise provided for under the product authorisation **which would otherwise apply**.

Use:

Field of use: **ONLY AS AN INSECTICIDE**

User: Professional

Crops/situations:	Maximum individual dose: (ml product / ha)	Maximum total dose:	Maximum number of treatments:	Latest time of application:
Outdoor red beet	500	-	1 per year See 'Other Specific Restrictions'	Crop cover complete or 30 days before harvest
Outdoor crops of celeriac, Jerusalem artichoke, radish, salsify	500	-	2 per crop See 'Other Specific Restrictions'	Bulb size ready to harvest or 7 days before harvest

The following Aquatic Buffer Zones must be observed:

Crops/situations:	Aquatic buffer zone distance (metres):	Comment:
Celeriac, Jerusalem artichoke, radish, red beet, salsify	7	see Environmental Protection Phrase 1

Environmental protection:

(1) Crops/situations with >5m buffer zone:

Since there is a risk to aquatic life from use, direct spray from horizontal boom sprayers must not be allowed to fall within the distance specified for the crop of the top of the bank of any static or flowing

waterbody or within 1m of the top of a ditch which is dry at the time of application.

Spray must be aimed away from water.

- (2) Buffer zones must be measured in accordance with the guidance set out in the HSE Chemicals Regulation Division's website and any amendments made to it.
- (3) The results of the LERAP must be recorded in written form and must be available for a period of three years for inspection to any person entitled to exercise enforcement powers under or in connection with the Plant Protection Products Regulations 2011 or the Plant Protection Products (Sustainable Use) Regulations 2012. (An electronic record will satisfy the requirement for a written record, providing it is similarly available for inspection and can be copied).
- (4) Where the buffer zone is greater than 5m then it must not be reduced under the LERAP scheme.

Other specific restrictions:

- (1) This product must not be applied via hand-held equipment.
- (2) This product must only be applied in accordance with the terms of this extension of authorisation, the product label and/or leaflet and any additional guidance on extensions of authorisation.
- (3) A minimum interval of 14 days must be observed between applications
- (4) A minimum interval of 7 days must be observed between applications to radish.
- (5) A maximum of 4 applications must not be exceeded within a twelve month period when applying to celeriac, Jerusalem artichoke, radish and salsify.
- (6) A minimum interval of 30 days must elapse between the last treatment on the first crop and the first treatment on a second crop where 2 crops cycles are grown on the same area of land within a 12 month period when applied for outdoor crops of radish and salsify.

APPENDIX 2: GENERAL CONDITIONS FOR AN EXTENSION OF AUTHORISATION

Failure to comply with the following conditions will result in the withdrawal or amendment of the Extension of authorisation under Regulation (EC) No 1107/2009 and may result in other enforcement action, including prosecution.

Adverse effects:

The authorisation holder must immediately notify the Secretary of State, the Scottish Ministers and the Department of Agriculture, Environment and Rural Affairs in Northern Ireland (care of the Health and Safety Executive), if they have any new information on the potentially adverse effects of the authorised product, or of residues of an active substance in that product when used in accordance with the conditions of this Extension of authorisation. For those products authorised under Regulation (EC) No 1107/2009 authorisation holders must also tell the other relevant competent authorities of the EC Member States (a list of which is available from the Health and Safety Executive) and the EC Commission. Failure to comply with this requirement is an offence.

Provision of information:

The authorisation holder must comply with all requests for information required by, or on behalf of, the Secretary of State, the Scottish Ministers or the Department of Agriculture, Environment and Rural Affairs in Northern Ireland in accordance with Regulation (EC) No 1107/2009.
