

## EXTENSION OF AUTHORISATION FOR A MINOR USE OF A PLANT PROTECTION PRODUCT

### PLANT PROTECTION PRODUCTS REGULATION (EC) No. 1107/2009

Product name: Ranman Top

Active ingredient: 160 g / l cyazofamid

MAPP number: 14753

Product authorisation holder: ISK Biosciences Europe NV (Registered Company no. 601473)

Marketing company: Belchim Crop Protection Limited

This Extension of authorisation ends: on the final expiry date of use for the authorised product (unless otherwise stated)

If the authorisation of the above product is withdrawn or amended before the end date above, this Extension of authorisation will end on the same date as the authorisation for the product. This Extension of authorisation will be withdrawn or amended before its end date if a decision is taken to withdraw or amend this Extension of authorisation under Regulation (EC) No 1107/2009 on any other grounds.

Extent of authorisation: United Kingdom

This extension of authorisation for minor uses applies to all UK parallel trade products issued under Article 52 of Regulation (EC) No 1107/2009 for which Ranman Top with MAPP 14753 is the reference product.

Signed by: rachel.brown@hse.gov.uk  
Signing time: Monday, May 4 2020, 15:1:50 GMT  
Location: CRD York  
Reason to sign: For the Health and Safety Executive

HSE Digital Signature

This and the attached Appendices 1 and 2 are signed by the Health and Safety Executive ("HSE") for and on behalf of the Secretary of State, the Welsh Ministers, the Scottish Ministers and the Department of Agriculture, Environment and Rural Affairs in Northern Ireland.

Date of issue: 4 May 2020

## EXPLANATORY NOTES

1. This is Extension of authorisation number 1205 of 2020.
2. This Extension of authorisation will be published on the website of the Chemicals Regulation Division of the HSE.
3. Application reference number: COP 2019/00046
4. Persons using the product to which this Extension of authorisation applies should acquaint themselves with and observe all requirements contained in the Regulation (EC) No 1107/2009, including the duty on the holder of any Extension of authorisation to notify information on potentially dangerous effects, a contravention of which is a criminal offence under those Regulations.
5. Neither the efficacy nor the phytotoxicity of the product for which this Extension of authorisation has been granted has been assessed and, as such, the user bears the risk in respect of failures concerning its efficacy and phytotoxicity.

## ADVISORY INFORMATION

**IMPORTANT:** When applying this product under the terms of this Extension of Use Notice, comply with any resistance guidance or restrictions stated on the product label.

Total reliance on one pesticide will hasten the development of resistance. Pesticides of different chemical types or alternative control measures should be included in the planned programme. Alternating with different modes of action is a recognised anti-resistance strategy. To prevent the development of resistance no more than 6 applications should be applied per 12 months, preferably in two blocks of three applications. This use pattern will allow for alternation with a fungicide with a different mode of action.

The use of this product in recirculating water systems in a glasshouse may result in dilute pesticide waste that requires disposal. All dilute pesticide waste must be disposed of safely and legally to protect humans, wildlife and the environment, especially groundwater and surface water. Pesticide disposal advice is detailed in the 'Code of Practice for Using Plant Protection Products (Section 5: Disposing of Pesticide waste)'.

This Extension of Authorisation relates to the use of 'Ranman Top' (M14753) for the control of downy mildew (various species). Applications to be made via a foliar spray with hand-held spraying equipment and conventional hydraulic sprayers including air-assisted sprayers in a minimum of 600 to 1200 litres of water per ha with 7 to 10 days interval.

## APPENDIX 1: CONDITIONS OF EXTENSION OF AUTHORISATION

The conditions below are obligatory. They must be complied with when the Extension of authorisation occurs. Failure to comply with the following conditions will result in the withdrawal or amendment of the Extension of authorisation under Regulation (EC) No 1107/2009 and may result in other enforcement action, including prosecution. For the purposes of this Extension of authorisation only, the conditions and/or requirements shown below supersede any corresponding conditions and/or requirements set out on the label or otherwise provided for under the product authorisation **which would otherwise apply**.

### Use:

Field of use: **ONLY AS A FUNGICIDE**

User: Professional

Crops/situations:	Maximum individual dose: (litres product / ha)	Maximum total dose:	Maximum number of treatments: (per year)	Latest time of application:
Outdoor ornamentals grown in soil, organic growing media & inorganic growing media (hydroponics)	0.5 See Other Specific Restrictions 2 and 3	-	6 See Other Specific Restriction 4	-
Protected ornamentals (temporary & permanent) grown in soil, organic growing media & inorganic growing media (hydroponics)	0.5 See Other Specific Restrictions 2 and 3	-	6 See Other Specific Restriction 4	-

Operator Protection:

- (1) Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment:

- (a) Operators must wear suitable protective clothing (coveralls), suitable protective gloves and face protection (faceshield) when handling the concentrate.
  - (b) Operators must wear suitable protective clothing (coveralls) and suitable protective gloves when applying by a pedestrian controlled sprayer with vertical boom or where contact with treated foliage is unavoidable during application in protected situations.
- (2) However, engineering controls may replace personal protective equipment if a COSHH assessment shows that they provide an equal or higher standard of protection.
  - (3) Operators must only use vehicle mounted or trailed horizontal or vertical boom sprayers where the operator's normal working position is within a closed cab with a suitable in-cab filtration system\* or suitable respiratory protective equipment\*\* must be worn during application in protected situations.  
\*Closed cabin meeting at least EN 15695 category 3  
\*\*Disposable filtering facepiece respirator to at least EN149 FFP3 or equivalent.
  - (4) Broadcast air assisted sprayers must only be used where the operator's normal working position is within a closed cab with a suitable in-cab filtration system\* during application in protected situations.  
\*Closed cabin meeting at least EN 15695 category 3

Other specific restrictions:

- (1) This product must only be applied in accordance with the terms of this extension of authorisation, the product label and/or leaflet and any additional guidance on extensions of authorisation.
- (2) A maximum of 1200 litres of dilute spray solution per hectare must not be exceeded when applying the product at a concentration of 42 ml of product per 100 litres of water.
- (3) The maximum individual dose must not exceed 42ml of product per 100 litres of water
- (4) The maximum number of treatments must not exceed 6 in a 12 month period.
- (5) The use of this product in recirculating water systems in a greenhouse may result in dilute

pesticide waste that requires disposal. All dilute pesticide waste must be disposed of safely and legally to protect humans, wildlife and the environment, especially groundwater and surface water. Pesticide disposal advice is detailed in the 'Code of Practice for Using Plant Protection Products (Section 5: Disposing of Pesticide Waste).

- (6) Application to pot plants in containers of less than 10cm - Applications must only be made between growth stages BBCH 10 (first true leaf emergence) and BBCH 99 (dormancy).
- (7) Application to pot plants in containers of more than 10cm - Applications must only be made between growth stages BBCH 20 (pre-emergence of first side shoot) and BBCH 99 (dormancy).
- (8) Applications to field grown hardy nursery stock plants: Applications must only be made between growth stages BBCH 20 (pre-emergence of first side shoot) and BBCH 99 (dormancy).
- (9) Applications for bulb production in hydroponic media only: Applications must only be made between growth stages BBCH 10 (first true leaf emergence) and BBCH 99 (dormancy), and may only be used in conjunction with OSR 5.

## **APPENDIX 2: GENERAL CONDITIONS FOR AN EXTENSION OF AUTHORISATION**

Failure to comply with the following conditions will result in the withdrawal or amendment of the Extension of authorisation under Regulation (EC) No 1107/2009 and may result in other enforcement action, including prosecution.

### **Adverse effects:**

The authorisation holder must immediately notify the Secretary of State, the Scottish Ministers and the Department of Agriculture, Environment and Rural Affairs in Northern Ireland (care of the Health and Safety Executive), if they have any new information on the potentially adverse effects of the authorised product, or of residues of an active substance in that product when used in accordance with the conditions of this Extension of authorisation. For those products authorised under Regulation (EC) No 1107/2009 authorisation holders must also tell the other relevant competent authorities of the EC Member States (a list of which is available from the Health and Safety Executive) and the EC Commission. Failure to comply with this requirement is an offence.

### **Provision of information:**

The authorisation holder must comply with all requests for information required by, or on behalf of, the Secretary of State, the Scottish Ministers or the Department of Agriculture, Environment and Rural Affairs in Northern Ireland in accordance with Regulation (EC) No 1107/2009.
