## ADVISORY INFORMATION

**IMPORTANT:** When applying this product under the terms of this notice comply with any resistance guidance or restrictions stated on the product label.

Total reliance on one pesticide will hasten the development of resistance. Pesticides of different chemical types or alternative control measures should be included in the planned programme. Alternating with different modes of action is a recognised anti-resistance strategy.

This Extension of Authorisation relates to the use of 'Karma' (M16363) as a fungicide for the control of downy mildew and powdery mildew, including powdery mildew (*Neoerysiphe spp.*), powdery mildew (*Golovinomyces spp.*), downy mildew (*Bremia lactucae*) and downy mildew (*Peronospora spp.*). Applications must be made by conventional hydraulic sprayers or hand held sprayers in a minimum water volume of 600 litres of water per hectare.
