

## HGCA HARVEST RESULTS 2005 SPRING WHEAT

Data were assembled with care but treat differences below the LSD cautiously.  
 Performance variation is not Crop Evaluation or HGCA's responsibility.  
 The control is the mean of Paragon, Ashley & Chablis.

GRAIN YIELD FROM FUNGICIDE TREATED TRIALS			Provisional results		02-OCT	
Variety	ID	01-05 Mean	2005 Mean	R'well Lincs	C'linge Suffolk	Andover Hants
Control (t/ha)		7.25	6.6	8.2	5.5	6.0
PARAGON	1059	93	95	95	94	96
