RH = restored hybrid

Conv = conventional open-pollinated variety

[] = limited data

P1, P2 = first and second year on list

C = yield control

* = variety no longer in trial

On the 1-9 scales high figures indicate that a variety shows the character to a high degree (e.g. early maturity)

Average LSD (least significant difference) 5%. Varieties that are more than one LSD apart are significantly different at the 5% confidence level
