Worksheet 2

CuSum graphs for pregnancy rates

Chart Pregnancy Diagnosis results for your whole herd, separate cow groups or different inseminators to monitor Pregnancy Rate success and trends that could be related to season, management or nutrition (Section 3).

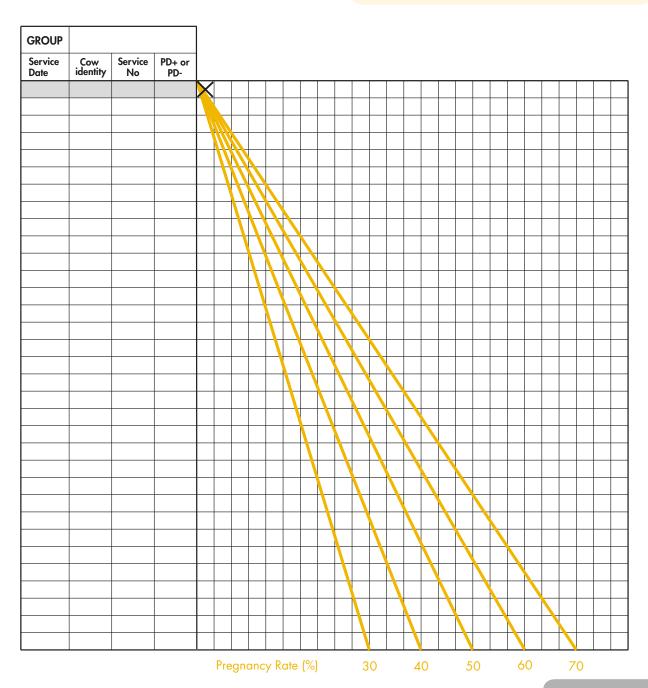

Enter the results in service date order.

Mark each positive PD with a cross one box below and to the right of the last cross.

Mark each negative PD or return to service with a cross in the box immediately below the last cross.

The yellow lines indicate specific Pregnancy Rate levels.

CuSum graphs for submission rates

Chart Submission Rates for your whole herd, separate cow groups or different observers to monitor heat detection success and trends that could be related to season, management or nutrition (Section 3).

Enter the results in service date order.

Mark each service within the eligible period (Voluntary Waiting Period + 21 days) with a cross one box below and to the right of the last cross.

Mark each service outside the eligible period with a cross in the box immediately below the last cross.

The yellow lines indicate specific Submission Rate levels.
