

Group mating assessment

Use this pro forma in the absence of individual milk or type records as a simple way of allocating your cows into groups for mating (Section 6: Example 6.2)

- 1. List your 3 or 4 priority herd improvement traits (Yield, Fat %, Longevity, Legs and Feet, fitness, etc) at the head of each main column.
- 2. Identify the main weaknesses of each cow to be bred with crosses under the trait columns, as appropriate.

3. All	locate ed	ach cow t	o the sire	from you	ır selected
bull te	eam whi	ch best a	ddresses	her main	weaknesses.

Using a copy of this sheet will allow repeated re-use
