Worksheet 9

Service sire listing

Use this pro forma to provide a handy reference to the cows and heifers to be inseminated with each main herd sire (Section 6: Example 6.3).

- 1. List the 3 or 4 main herd sires at the head of each column.
- 2. Note down the 2 or 3 key traits in which they demonstrate particular strength.

3. List down under each of the sires all the cows and heifers to be mated (using the group mating assessment list from **Worksheet 8**, if required).

Using a copy of this sheet will allow repeated re-use
