

Bull usage records

Use this pro forma to assess the average genetic value of the bulls used in your herd last year (Section 3: Example 3.3).

Using a copy of this sheet will allow repeated re-use

1. List the sires used widely across the herd last year.
2. Fill in the current proof information for each sire from the latest independent DairyCo Breeding+ figures (available at www.dairyco.org.uk).
3. Calculate the average proof for each trait.
