

What is it?

Export Health Certificates (EHC) Online

A new digital online application service for Export Health Certificates (EHC) has been developed.

First step in the digital journey towards a fully online EHC service

This replaces the current manual PDF service which requires forms to be downloaded, filled in manually and sent to APHA via email.

The story so far...

- We are at the beginning of the process for developing the new system – further developments will be made available in the future
- To date, EHC Online has been tested with exporter businesses and certifiers across numerous commodity groups
- This testing period has provided good insights and feedback – allowing for further enhancements to be made to the online service

... and next steps

- From **Winter 2020**, EHC Online will have fully replaced the current system for applying for and certifying EHCs
- You can access available EHC's which can be applied for now via the .gov.uk Form Finder pages
- Over 70+ of the most popular EHCs are being made available online across a number of commodity groups, including: meat, poultry, fish, germplasm, hides and skins, dairy.

What does it do for Exporters?

EHC Online allows exporters to

- Fully apply, complete, submit and manage EHCs online
- View application status on the online dashboard
- Copy information from previous certificates into new applications
- Start an application and edit at a later date
- Never accidentally submit an old version of an EHC – it will update automatically!
- All previous applications stored in one place

Forms Available

Commodity	EHC	Description	Destination Country
Animal Products Including Food	7788	Export of poultry meat, raw poultry meat preparations and meat products to Angola	Angola
Animal Products Including Food	7779	Export fish feed for farmed salmonids	Australia
